

## HAVE YOU REGISTERED YET?

The UK 'EMO Encore' Open House is just around the corner! Don't miss your chance to see machines recently unveiled at EMO and the newest technology, on show at the European Technology Centre in Worcester.

The event taking place from **14th to 17th November** gives you an excellent opportunity to see machines in live cutting demonstration and speak to our experts who are on-hand to help you with your machining needs.

**REGISTER TODAY >>**

Show us your Formula 1 skills at the Open House by having a go on the McLaren car simulator!

Let us know you're coming! Follow us on our Facebook EMO encore event page - get up to date info, let us know when you'll be there and find out who else is going!

## NEW AUTOMATION

FEATURED  
TECHNOLOGY

As a world-leader in providing factory automation system solutions we look to help machine users enhance machine productivity and efficiency.

We'll be giving a taste of this technology at our EMO Encore Open House, including

**QUICK TURN 250MY  
+ TA-12/200**

A UK manufactured machine with the new TA-12/200 system provides a fully integrated robot loading solution for unmanned operation with quick and easy set-up.

**MULTIPLEX W-200Y  
with Gantry Loader**

A CNC turning lathe for automated mass production with a newly developed Gantry Loading system reduces load/unload cycles by 25% compared to conventional models.

**HCN-4000 + MPP**

This horizontal machining centre is designed for high productivity and reliability and is equipped with the high capacity MPP automation system, specifically designed for unmanned lights out running.

**FIND OUT MORE >>**

**HYBRID  
MULTI-TASKING**

Our Additive Manufacturing (AM) portfolio offers customers three key AM technologies; Multi-laser metal deposition, Laser Metal Deposition and Wire Arc AM. All of which can ultimately deliver shorter lead times, reduced in-process inventory and lower indirect labour.

Examples of 3D AM and Wire Arc AM can be seen at the UK Open House with demonstration on both the INTEGREX i-300S AM and VARIAXIS j-600/5X AM.

## Mazak iSMART Factory™

In an industry 4.0 factory every aspect of production is connected, monitored and analysed; from production scheduling through to virtual simulation of the component to be cut, energy consumption, tool management and maintenance practices.

At Mazak we have taken the Industry 4.0 principles and applied them to our own production facilities, so that we can use own experience to drive innovation for our customers.
